ONLINE ACTIVITY #2
Personalized Linux, and Git Cheat Sheet

Using any available resources (official Git documentation, online tutorials, or the built-in git --help command), research the following topics and create a personalized 1-page (A4) cheat sheet:

1. Basic Linux commands (command, sample usage) (at least 10)
2. Basic Git commands (command, sample usage, description (use your own wordings), common options/flags

git init	git restore
git status	git branch
git add	git checkout / git switch
git commit	git merge
git log	git tag
git diff	git clone

3. the three-tree architecture of Git

You are free to use any design or color scheme, just make sure it is readable.

Submission:

1. Use PDF as the file format for your cheat sheet.
2. Upload it to your GitHub repository
3. Submit the link here: <https://drive.google.com/drive/folders/1-Y6e6E6PoLyGgB0WZ8prRCNfolpV3cj0?usp=sharing>

Command	Description
pwd	Show current directory
mkdir <directoryname>	Create new directory
rm <filename>	Delete file
cd ..	Navigate to prev directory
ls	List of file and directory
cd <location>	Change directory
mv <source> <destination>	move files to destination
cp <source> <destination>	copy files to destination
touch <filename>	create or update empty file
cat <file>	display the contents of the file
tar	extract and compress file
echo	print text

Command	Description
git init	start new repo
git status	check what you added
git add	add all unsaved file
git commit	add a message
git log	show every modified file
git diff	compare the unstaged changes
git restore	restore or undo
git branch	branch list
git checkout / git switch	delete unstaged change
git merge	combine
git tag	create versions
git clone	download or copy the repository

the three-tree architecture of Git
